Opportunity / reference	

2 · LEA Labs conversation context

LEA Labs exists to close the distance between learning and doing. LEA brings together educators, mentors, builders, and community connectors so people and ideas can grow. Its work is practical: clear teaching, guided practice, evidence of capability, and a more confident next step.

When introducing LEA, explain the relevant part of the connected model. The Learning Platform builds practical digital capability. Corporate Training develops digital fluency, applied AI, leadership, innovation, and early-career strength. Technology Services turns ideas into useful digital products and systems. Operations makes delivery, partnerships, reporting, finance, CRM, events, and learner workflows more connected.

3 · Purpose and attendees

Meeting purpose:

Attendees and roles:

Agenda:

4 · What we heard

Client / partner priorities:

Current situation or challenge:**Desired outcome:****Decision criteria, constraints, budget, timing, or procurement context:**

5 · LEA Labs response

Relevant LEA capability or offer discussed:

How the LEA progress model fits: LEA helps people and organisations **start** → **practise** → **share** → **advance**. Note how the proposed work will create practice, feedback, evidence, and a next opportunity.
