

Impact Report

Reporting & Impact · show how LEA Labs activity becomes capability, opportunity, and lasting value

Purpose. An impact report goes beyond activity counts. It explains the change that took place, the evidence supporting that change, who benefited, what enabled it, and what should be sustained or improved.

1 · Report details

2 · LEA Labs impact approach

LEA Labs is built on the belief that learning should lead to something real. LEA helps people and organisations **learn** → **evolve** → **advance** → **impact**. The impact journey may begin with access and participation, develop through practice and support, become visible through projects or improved capability, and continue through opportunity, organisational change, enterprise, or community benefit.

Use this report to connect the chain: **activity** → **participation** → **learning or capability** → **application** → **outcome** → **longer-term impact**. Be clear about what the evidence shows and what remains an assumption.

3 · Impact summary

Headline impact:

Who benefited and how:

Most important evidence:

4 · Impact pathway

Activity / input	Participation / output	Capability / change	Outcome / impact

5 · Evidence and indicators

Quantitative evidence: registrations, attendance, completion, assessments, projects, certificates, products, adoption, reach, retention, revenue, cost savings, or other indicators.

Qualitative evidence: participant voice, case examples, observed confidence, improved practice, partner testimony, or changed behaviour.

Evidence limitations and attribution:

6 · Human story or case example

Person, group, organisation, or community:

Starting point:

What LEA Labs contributed:

What changed and what happens next:

7 · Inclusion, safeguarding, and responsible impact

Who may have been missed or underserved:

Accessibility, safeguarding, privacy, or ethical considerations:

8 · Sustainability and recommendations

What should continue, scale, or be handed over:

Recommendation for LEA Labs and the partner:
