

Partnership Overview

Business Development · understand the partner, explain LEA Labs, and define the opportunity

Purpose. Use this document to prepare a thoughtful partnership conversation. It captures who the prospective partner is, why LEA Labs is relevant, what a collaboration could achieve, and the next step toward a concept note, proposal, or agreement.

1 · Partnership details

2 · Who LEA Labs is

LEA Labs is a learning ecosystem built for forward motion. LEA connects practical learning, human guidance, and opportunity so people can build the skills and confidence to move into the digital economy. LEA believes that learning should lead to something real: a working project, a clearer capability, a stronger organisation, a useful solution, or a more confident next step.

LEA's vision is to make LEA a launchpad for digital possibility: a place where digital talent and sustainable technology enterprises can grow. Its mission is to build an ecosystem where learning fuels innovation, innovation creates solutions, and enterprise drives lasting impact. The LEA promise is practical, clear teaching, guided practice, and work people can show.

3 · What LEA Labs does

LEA brings four connected capabilities into one operating model. The **Learning Platform** provides project-based curriculum, course building, content libraries, assessments, coding practice, certificates, portfolios, and learner support. **Corporate Training** helps organisations strengthen digital fluency, applied AI, leadership, innovation, and early-career development. **Technology Services** supports architecture, full-stack integration, deployment, custom development, and practical digital products. **Operations** connects school management, partnerships, finance, reporting, CRM, events, and learner workflows.

LEA serves individual learners, children and families, corporate teams, schools, NGOs and community organisations, and strategic partners. The common thread is simple: connect people and organisations to a practical next opportunity.

4 · Partner profile

Who they are and what they do:

Who they serve and what matters to them:

Current relationship with LEA Labs:

Strategic priority, challenge, or opportunity:

5 · Why LEA Labs is relevant

Explain the specific LEA capability, experience, audience, technology, curriculum, network, or operating strength that makes LEA a credible partner for this organisation.

LEA value proposition for this partner:

6 · Partnership opportunity

Shared opportunity or challenge:

Proposed partnership idea:

Target audience / beneficiaries:

Expected result and evidence of impact:

7 · How the LEA progress model fits

LEA's progress model moves people from **start** → **practise** → **share** → **advance**. Participants find a starting point, turn ideas into working habits through challenge and repetition, use feedback to improve their work, and leave with evidence of what they can do and a clearer next step.

LEA's operating rhythm is also expressed as **learn** → **evolve** → **advance** → **impact**. A strong partnership should therefore explain not only what activity will happen, but what capability will be built, what evidence will be produced, how feedback will improve the work, and where the result will be applied.

How this partnership will help people start:

How participants or the organisation will practise and build:

What they will share, demonstrate, or improve:

What advancement or impact should follow:

8 · Fit and readiness

Assessment	Notes and evidence
Strategic fit	
Audience / market fit	
Delivery readiness	
Funding / commercial route	
Decision-maker identified	

9 · Recommended next step

Next action:

Owner and target date:

Documents to prepare:

Working principle. Start with a conversation about the outcome the partner wants to create. Move from curiosity to capability, and from capability to contribution.
